

ASCO Engineering Ltd prides itself in being a professional, personable organisation offering a service to supply general machine engineering and thermal spray coating (HVOF, Plasma), Laser Cladding (LMD) and precision finishing services.

We are committed to maintaining delivery of high levels of customer service with particular emphasis on customer satisfaction and believe this can only be achieved by a well-equipped, experienced and competent workforce working to a managed documented quality system.

Our systems are founded on a framework of formal Quality Objectives that are set, developed and continuously maintained and based upon the following principles: -

- **To operate a Management System, which is appropriate to our organisation, effective and in compliance with ISO 9001:2015 & AS9100 REV.D.**
- **Ensuring customer satisfaction through high levels of service and continuous improvement.**
- **Developing, monitoring and reviewing a framework of risk reducing measurable objectives.**
- **Providing sufficient resources to maintain, Qualitative, Legal and Statutory compliance.**
- **Maintaining professional relationships with our staff, customers and suppliers.**
- **Provide a controlled, safe and environmentally hospitable workplace.**

This Policy is available to all interested parties and communicated to all staff throughout the company. It will be reviewed, at least annually, at Management Review meetings, thereby allowing staff to participate in company improvement.

As Chief Executive Officer of Asco Engineering Ltd, I am ultimately responsible for the quality of all our services and systems. It is essential that when performing our individual tasks and daily responsibilities, we all act in accordance with the requirements of this Quality Management System, maintain our high standards, continually improve and remain accountable.

Signed: _____

Shaun Deegan
Chief Executive Officer (CEO)
Asco Engineering Ltd.
